To study urban cellular propagation, it is customary to classify the physical environment as being either line of sight (LOS) or non line of sight (NLOS) between a transmitter (TX)

### **28 GHz Propagation Measurements for Outdoor Cellular**

A cellular network or mobile network is a communication network where the last link is wireless. The network is distributed over land areas called cells, each served by at least one fixed-location transceiver, but more normally three cell sites or base transceiver stations. These base stations provide the cell with the network coverage which can be used for transmission of voice, data, and ...
