I am a member of the Data Management, Exploration and Mining group in Microsoft Research Redmond. I work on various aspects database systems, mostly related to data integration and transaction processing. Currently, I'm working on a distributed systems programming framework, called Orleans, which was released as open source in January, 2015 and is widely used inside and outside Microsoft.

Phil Bernstein at Microsoft Research

Go (often referred to as Golang) is a programming language designed by Google engineers Robert Griesemer, Rob Pike, and Ken Thompson. Go is statically typed, compiled, and syntactically similar to C, with the added benefits of memory safety, garbage collection, structural typing, and CSP-style concurrency. The compiler, tools, and source code are all free and open source.

Go (programming language) - Wikipedia

Concurrent computing is a form of computing in which several computations are executed during overlapping time periodsâ€”concurrentlyâ€”instead of sequentially (one completing before the next starts). This is a property of a systemâ€”this may be an individual program, a computer, or a networkâ€”and there is a separate execution point or "thread of control" for each computation ("process").

Concurrent computing - Wikipedia

C++ 11 delivered strong support for multithreaded applications, and the subsequent C++14 and 17 updates have built on this baseline. C++ has better options for concurrency than ever before, which means it's an incredibly powerful option for multicore and parallel applications.
