Reliable structures, very precise drawings. CYPECAD was brought about to carry out the analysis and design of reinforced concrete and steel structures, subject to horizontal and vertical forces, for houses, buildings and civil work projects.. Its use guarantees maximum analysis reliability and the best drawing design, including the following elements:

Structural Engineering & Geospatial Consultants The main features of this construction process are as follows: The division and specialization of the human workforce The use of tools, machinery, and other equipment, usually automated, in the production of standard, interchangeable parts and products

### **PRECAST CONCRETE STRUCTURES - paradigm | Structural Design**

Concrete, usually Portland cement concrete, is a composite material composed of fine and coarse aggregate bonded together with a fluid cement (cement paste) that hardens over time—most frequently a lime-based cement binder, such as Portland cement, but sometimes with other hydraulic cements, such as a calcium aluminate cement. It is distinguished from other, non-cementitious types of concrete ...
