High availability (HA) is a characteristic of a system, which aims to ensure an agreed level of operational performance, usually uptime, for a higher than normal period.. Modernization has resulted in an increased reliance on these systems. For example, hospitals and data centers require high availability of their systems to perform routine daily activities.

Most reliability engineers are familiar with the life cycle bathtub curve, the shape of the hazard rate or risks of failure of a electronic product over time. A typical electronic's life cycle bathtub curve is shown in figure 1. The origination of the curve is not clear, but it appears that it was based on ' Continue reading Why The Drain in the Bathtub Curve Matters '
