Systems Simulation: The Shortest Route to Applications. This site features information about discrete event system modeling and simulation. It includes discussions on descriptive simulation modeling, programming commands, techniques for sensitivity estimation, optimization and goal-seeking by simulation, and what-if analysis.

Simulation modeling is the process of creating and analyzing a digital prototype of a physical model to predict its performance in the real world. Simulation modeling is used to help designers and engineers understand whether, under what conditions, and in which ways a part could fail and what loads it can withstand. Simulation modeling can also help to predict fluid flow and heat transfer ...

About WinSim. WinSim develops and markets DESIGN II for Windows, a steady-state and dynamic process simulator. We have been doing this since 1995 when we purchased the rights to the program from ChemShare Corporation .WinSim has over 2,000 active users of DESIGN II throughout the world.

Modeling and simulation (M&S) in simple terms is a substitute for physical experimentation, in which computers are used to compute the results of some physical phenomenon. As it is apparent from its name "Modeling and simulation" firstly a computer is used to build a mathematical model which contains all the parameters of physical model and represent physical model in virtual form then ...

- [Voiceover] Hi, I'm Curt Frye. Welcome to Process Modeling in Excel Using VBA. In this course, I'll show you how to simulate processes in versions of excel from 2010 to 2016. I'll start by showing you how to define classes, assign values to properties, and gather instances of a class into a collection. I'll review how to declare the variables you need, define the objects that make up a ...

Right from the very beginning, we designed CarMaker according to the principle of openness. In addition to a complete simulation environment with tools for test automation and the visualization of virtual test runs, the

simulation solution includes numerous interfaces for third-party tools, allowing it to fit seamlessly into your existing development process.
