This document is part of the process for improving the quality of care in family planning. Specifically, it is one of two evidence-based cornerstones (guidance documents) of the World Health Organization’s (WHO’s) initiative to develop and implement family planning guidelines for national programmes.

1 Faster R-CNN: Towards Real-Time Object Detection with Region Proposal Networks Shaoqing Ren, Kaiming He, Ross Girshick, and Jian Sun Abstractâ€”State-of-the-art object detection networks depend on region proposal algorithms to hypothesize object locations. Advances like SPPnet [1] and Fast R-CNN [2] have reduced the running time of these detection networks, exposing region

How can we best identify, understand, and deal with ethical and societal issues raised by healthcare robotics? This paper argues that next to ethical analysis, classic technology assessment, and philosophical speculation we need forms of reflection, dialogue, and experiment that come, quite literally, much closer to innovation practices and contexts of use.

Ethics of healthcare robotics: Towards responsible

Science, technology, and innovation (STI) have the power to transform societies by providing solutions on how to eradicate poverty, improve social and economic conditions, increase resilience to natural hazards, and preserve natural resources for future generations. To tap into this transformative ...

During the following years a number of experimental approaches characterized a neural correlate of self-awareness more fully. The early studies were done primarily with the ^{15}O H_2O PET method, which is still considered a gold standard for examining the distribution of activity in the brain. For practical reasons, most recent studies have used functional magnetic imaging (fMRI).
